	Principles of Grid- (LEC)	2.09 - Principles of Grid- and Cloud-			  	link

„Normal“ Lecture

- At the place you are enrolled „normal“ lectures can be attended as for other courses
- For students that are not located at the site where the lecture is taking place, several other modes are provided

Video Recording

- Lectures are recorded and provided as video files
- Video files can be downloaded and watched at anytime
- Depending on the lecture all sessions are available from the beginning or will provided video by video every week

Individual Live Streaming

- Lectures are live streamed to the internet
- Each student can watch the lecture on a computer, normally directly in the web browser
- There is no feedback channel available

Individual interactive Live Stream

- Some lectures or tutorials are provided as interactive live stream
- Each student requires a computer with a headset
- Students can interact with the lecturer and the other participants

Live transmission to other Universities

- The lecture is live streamed to one or multiple other lecture halls at the other sites
- The multimedia rooms are fully equipped with cameras and microphones
- Feedback channel is available

(Partial) physical attendance

- Physical attendance required 
 - For some labs or seminars with „hands-on“ experience the student needs to be physically at the site
 - Normally the important courses, i.e. corresponding to your research focus, should be available at your site
 - Often block courses are provided so that a trip to one of the other site may be worthwhile
- Partial physical attendance required 
 - For some courses only partial physical attendance is required, e.g. for final presentations or doing certain tutorials

Further Modes

- Please read carefully the comments section of the lectures because sometime further modes are provided e.g. the use of social networks, blogs etc.

Overview of ITIS lecture modes

Lecture Mode	Requirements	Live
„Normal“ Lecture	Just join the first lecture	Live
Video Recording	A device that is capable of playing the video file (Normal media player should be sufficient)	Not live
Individual Live streaming	A device that is capable of playing the live stream (Browser with corresponding plugin installed)	Live
Individual interactive live streaming	A device that is capable of playing the live stream and a headset (Browser with corresponding plugin installed)	Live
Other modes	Web browser to access corresponding web pages	Not live
Physical Attendance	Student needs to be present at the site for all sessions of the lecture	Live
Partial physical attendance	Student needs to be present for a certain number of sessions of the lecture	Live

Some final remarks about the ITIS lectures

- Please select only lectures which are published on the official ITIS webpage:
<http://www.itis-graduateschool.de/web/content/lectures>
 - Lectures may start at different dates in the semester, please check the starting dates on the webpage
 - Lectures that are provided at the site you are enrolled
 - Just join the first session without registration, unless it is explicitly stated on the webpage
 - Lectures provided by another site
 - Please contact the corresponding assistant stated on the webpage
 - Different research groups and sites are involved so it is likely that some lectures will overlap
 - Please check which lectures fit in your timetable
- ➔ All information should be on the webpage, if not contact the assistant
